Computer Programming II   Mrs. Alano

1. Write a While loop to find the sum of the numbers from 1 to 100.
2. Write a Do-While loop to do the same as #1.

3. Write a While loop that keeps reading in an integer and prints "I can't wait for summer!" until the integer entered is a -1.
4. Write a Do-While loop to do the same thing.

5. Use a while loop to print the following table.

X	X-Squared
0	0
1	1
2	4
3	9
4	16
5	25

6. Change the above around so that you can input the start and end values for the table.
